## DEFEND-A-VEND

**Lock out costly crime  
for good with the  
Custom-made, high  
security vending cage  
from Safer Systems  
(UK) Limited.**

Installing vending machines on prime sites often means placing your machines in vulnerable areas where they risk high exposure to crime, resulting in lost sales and costly repairs.

At Safer Systems, we recognise the importance of keeping your machines working for you – not the criminal. Our tailor-made Defend-a-Vend cages are designed to fit any vending machine or group of machines, protecting you from crime and vandalism.

Made from high-grade steel, with a transparent Lexan front panel, the cage ensures maximum visual impact and easy access by the user and operator – but not the criminal.

With Defend-a-Vend, enjoy maximum sales and complete peace of mind.
