I N T E L L I B A G ®

The revolutionary cash audit system from Safer Systems

Combining smart technology and cash security in a unique new audit system which is simple, secure and very, very smart.

We all know that time is money, yet all too often we burden ourselves with sifting through mountains of useless information just to receive the information we actually need.

KEEPING YOUR MONEY SMART ...

Now with Intellibag®, you can receive the information you need quickly and easily.

Important operating information from each machine is transmitted to the Intellibag prior to it being removed from the funnel, including:

- The amount of cash held in the bag
- Identified route operator
- Number of vends made
- Balance of the coin changer
- Serial number of the coin mechanism
- Machine serial number

MACHINE SITE

Any Vending Machine

Once downloaded to the bag, the information is locked away securely encrypted. Access to the cash and the important operating data cannot be obtained except by authorised personnel at the company's secure office.

AND SECURE ...

And, because Intellibag is based upon Safer Systems' international best selling Custodian self-locking cash bag, it features all its advanced security features also, keeping your money securely locked away in the tamper-evident bag.

Security is further enhanced by Intellibag only permitting access to the machine by recognised electronic fob holders.

CAN BE SIMPLE TOO .

Intellibag is designed to provide you with the flexibility your business needs. The system can be made 'on-line' ready to enable it to work alongside your current telemetry system or back office systems.

And Intellibag is non-machine specific, making it a cost-effective addition to your existing cash audit facilities also.

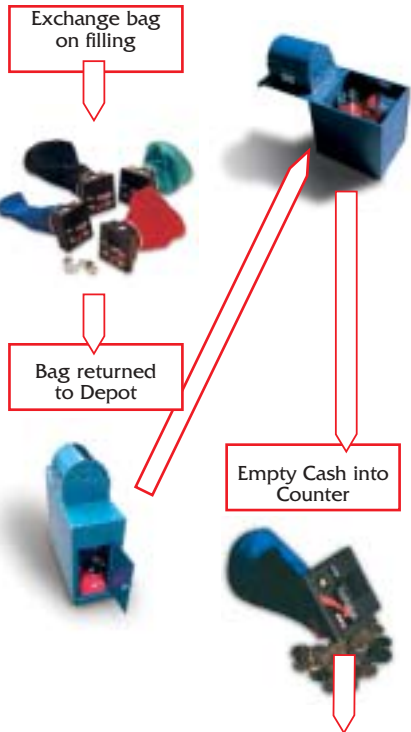

Intellibag – the Smart just got Smarter.

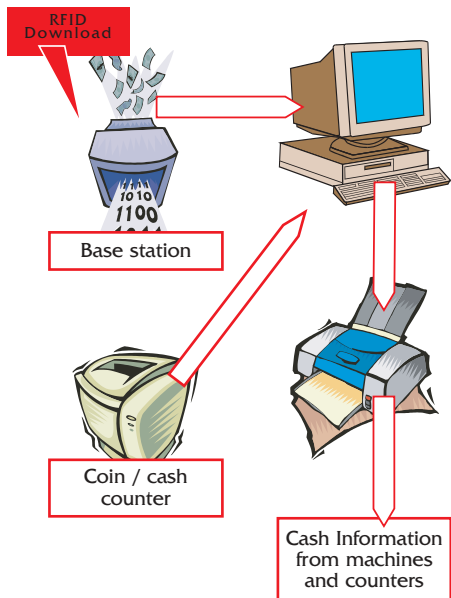

INTELLIBAG®

The revolutionary cash audit system from Safer Systems

TRANSIT

PROCESSING DEPOT

SMART :

- Full cash audit of sales and coin tubes
- No paper, PDA or infrared downloads
- Full asset audit of machines and coin mechanisms
- Full DEX downloads available
- No system on costs

SECURE :

- Locks out unauthorised access to valuable information
- Cash is securely locked away in tamper-evident bag
- Access to cash and information by authorised personnel only at secure cash office.
- Enjoys all the security features of the Custodian self-locking cash bag.

SIMPLE :

- Simply place the cash bag lid on the reader to download the information from each machine for full cash audit
- Fast, accurate information downloaded from the reader.

AND SAVING YOUR CASH TOO ...

Provides a cheaper alternative to machine security as well as protecting your cash and providing work audit facilities for your route operatives

Available as 'on-line' ready, enabling it to work alongside your current telemetry or back office systems.
