

THE VENDING SURROUND COLLECTION

The system you can bank on for better returns

In an industry where presentation is all-important, why hide your machines behind ugly security barriers? Create the right image at the right price - and keep your customers happy too.

With an increasingly sophisticated vending market, comes the need to provide security that both looks good and effectively tackles the problems of vandalism and crime.

Now, with Safer Systems, comes the next generation in vending surrounds, with our unique collection of surrounds for single and banked machines – maximising profits and minimising costs.

BE SEEN ...

Make an impact: with full graphics options, the metal vending surrounds provide the ideal platform on which to market your product and make a splash.

Whether the corporate image, with the smart wood-steel option for offices or cafeterias, or the young and trendy style for schools, colleges or retail parks, the surround that's right for you is available at affordable prices. Whatever you choose, the eye catching graphics will encourage impulse sales through maximum use of your visual presentation.

Also, all our surrounds are in-door/out-door compatible, providing the flexibility you require when placing your machine. And they are all CE marked and PAT tested for added peace of mind.

BE SAFE ...

For those who need a more secure solution, Safer Systems offers a security upgrade option, providing the effective vandalism and crime barrier that it needed in those isolated locations.

The secure systems retain all the eye-catching impact of the other banking systems, but provide high-grade steel surrounds, with tough polycarbonate and steel doors. So lock out the criminals and place your machines where they will work best for you.

BE FLEXIBLE .

The surround collection can be modified to reflect your exact vending requirements, for multi-machine sites. Machines can easily be added, changed or removed, giving you a flexible housing option.

And, because the surrounds are housed in metal, they are durable, ensuring your machines keep looking good for longer.

The surrounds come flat-packed and can be installed in just a few hours, with full install services available where required.

Chose Safer Systems – because you can bank on us.

THE VENDING SURROUND COLLECTION

The system you can bank on for better returns
